Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-7, 9-12, 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hopper. Hopper discloses a window frame comprising a first frame half 10a, a second frame half 10b having a ship orientation (not shown, but comprising the condition where only one of the barbs of the first means 35 engages only one of the barbs of the connector 80) and an install orientation (shown in figure 10) with respect to the first frame half, the second frame half being moved between the ship and install orientations by rotating the whole assembly which includes rotating the second frame half within its own plane and then moving the first and second halves toward one another until the position in figure 10 is reached, first connector means comprising the first barb of the connectors 35, 38 for releasably interconnecting the first and second frame halves when the second frame half is in the ship orientation, the first connector means being integral with the first and second frame halves, and second connector means comprising the second barb of the connectors 35, 38 for securely interconnecting the first and second frame halves only when the second frame half is in the install orientation the second connector means also be integral with the first and second frame halves.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hopper as applied to claims 1, 3-7, 9-12, 18 and 19, and further in view of Suh. Suh discloses a window frame comprising a first frame half 130 including a plurality of barbs 166 monolithically formed with the first frame half, and a second frame half 140 including a plurality of receives 164 monolithically formed with the second frame half.

It would have been obvious to one of ordinary skill in the art to provide Hopper with a barbs, as taught by Suh, to provide a more secure attachment of the first and second frame halves.

Response to Arguments

Applicant's arguments filed June 24, 2003 have been fully considered but they are not persuasive.

The applicant's comments in appendices A and B have been considered, but they are not persuasive for the reasons set forth in the previous Office actions in the parent application, 09/412,763.

With respect to the applicant's comments concerning the interview in the parent case conducted June 20, 2001 (copy attached), the examiner respectfully disagrees. It

should be noted that claims 1-17 fail to set forth the first and second connector means being monolithic with the respective first and second halves. Moreover, box (g) was checked on the interview summary indicating that an agreement to the claims was not reached. Additionally, the phraseology "appears" was used in summarizing the interview indicating that additional review was necessary before a final decision could be made. Thus, upon further consideration, it was determined that the changes discussed in the interview of June 20, 2001 alone are not enough to place the case into a condition for allowance.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
